

P.O. Box 266
Jackson Wyoming 83001

Dear Sirs,

Thank you for your interest in my campaign.

It is my policy not to respond to organizations requesting answers to questions that attempt to define me. These polling questions rarely give a complete and accurate description of my true position on the issues, and this is the reason for my policy.

There are issues that I feel very strongly about that do define me, however. I believe:

- In a limited government that is fiscally responsible and benefits all its citizens.
- That every child should have the opportunity for an excellent education that prepares them for life.
- That our wildlife is a great gift and a valuable resource; its preservation is crucial to our economy and quality of life. The well being of our wildlife and their habitat will be a priority of mine.
- That we must protect the quality of our air and water for ourselves and future generations. We are fortunate to have the gas, oil and coal industries in Wyoming and I will work hard to ensure that the energy industry operates responsibly.
- I will do everything in my power to analyze the effects of government actions on the economy because a vibrant economy provides opportunities.

Should your organization share my visions and priorities, I would very much appreciate your support at the polls. A donation would also be welcomed. Thanks again for your interest.

Sincerely,

Jim Darwiche
